

Variations in Austronesian Bare Passive Agents

Hiroki Nomoto Tokyo University of Foreign Studies (TUFS) / Nanyang Technological University (NTU), Singapore

The issues & claims

Empirical

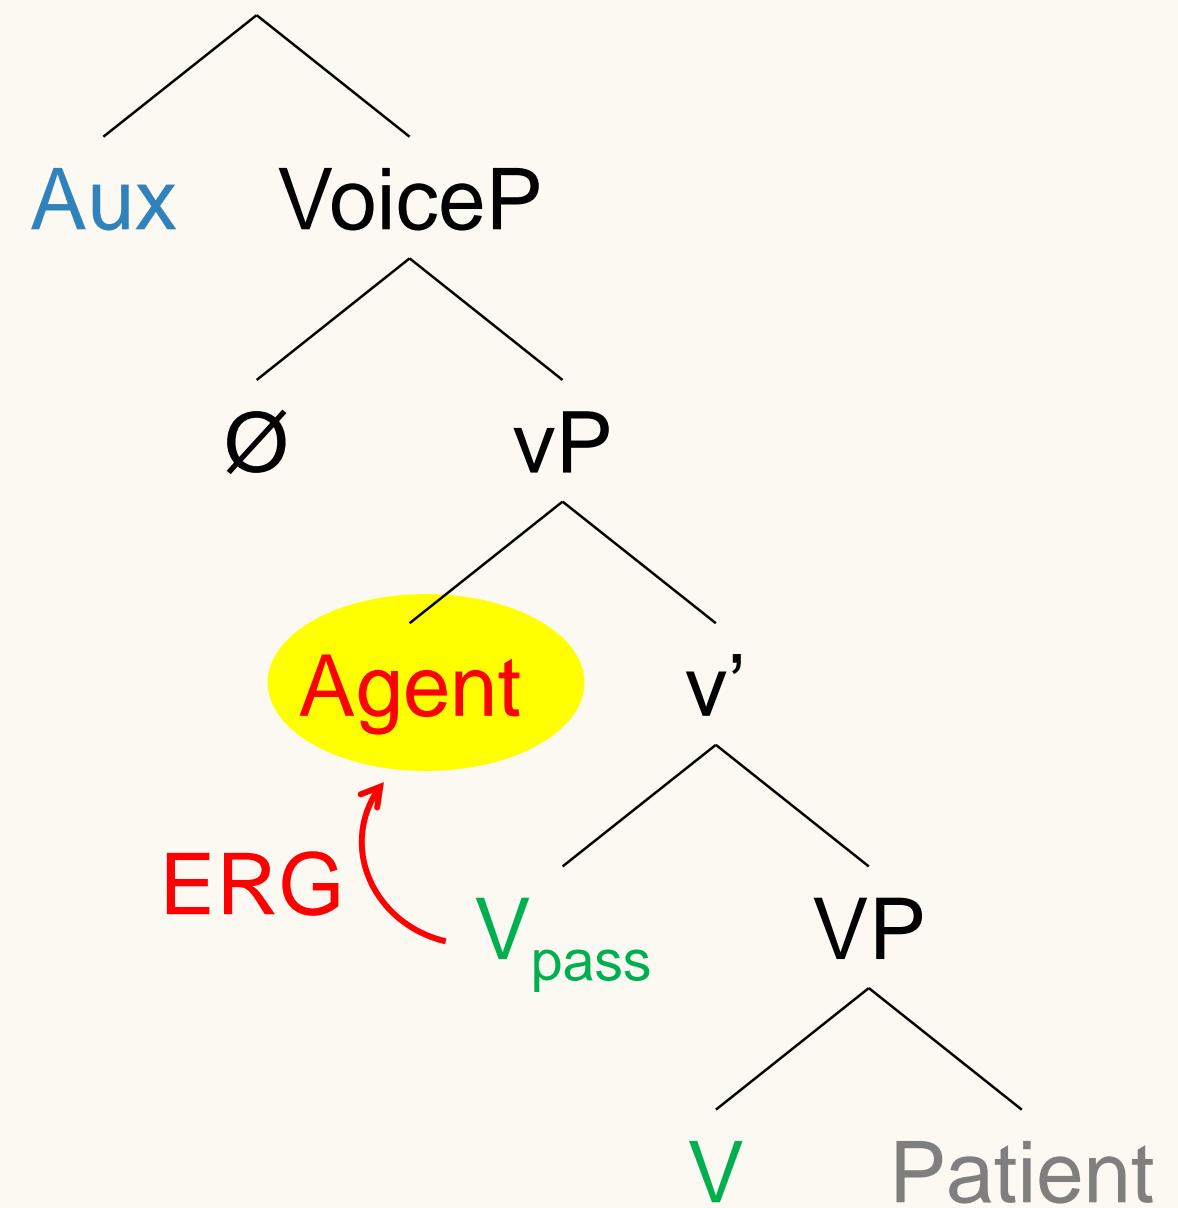

How do Austronesian languages vary regarding possible bare passive agents?

→ Implicational hierarchy

Theoretical

How is the non-active voice agent licensed?

→ Similar to nominative case-licensing in split ergativity (Silverstein 1976)

Austronesian voice systems

Malay-centric view (Nomoto 2015, under review)

Marker	Active	Passive
Overt	Morphological active [Actor voice/focus] Absent in English	Morphological passive [Passive type 1, Canonical passive] Absent in Philippine-type
Null (reduced)	Bare active [stem sentences] Absent in many Austronesian languages	Bare passive [Passive type 2, Pasif semu, Object(ive) voice, Undergoer voice/focus, Patient voice/focus] Absent in English

+ Applicative constructions [Benefactive, Instrument, Locative, etc.]

Standard Malay

(1) a. Bare active: Agent Aux V

Siapa-kah yang **saya** **boleh** **hubung-i?** (Object extraction)
who-Q REL 1SG can contact-APPL_{LOC}

b. Bare passive: Aux Agent V [Agent adjacent to bare V stem]

Siapa-kah yang **boleh** **saya** **hubung-i?** (Subject extraction)
who-Q REL can 1SG contact-APPL_{LOC}

c. Morphological passive: Aux PASS-V (Agent)

Siapa-kah yang **boleh** **di-hubung-i?** (Subject extraction)
who-Q REL can PASS-contact-APPL_{LOC}
'Who is the person that {I can contact/can be contacted}?'

Implicational hierarchy

Morphological passive

Codic pronouns

Unspecified
3rd
Classical Malay (Nomoto 2016)

Core data

Sama Bangingi' (Gault 2002: 372)

(2) Bay na **bowa{ku/ *e' si Inah}**
PST COMPL bring=1SG ERG ART mother
palauk-in pe' ma=iya.
viand-the there OBL=3SG
'{I/*Mother} have/has already taken the viand
there to her.'

Standard Indonesian (Sneddon et al. 2010: 259)

(3) Surat ini harus **bapak** **tandatangan-i.**
letter this must father sign-APPL_{LOC}
'{You/*Father} must sign this letter.'

Madurese (polite register; Jeoung 2017: 21, 24–25)

(4) Potra-epon ampon {ramah /*Pak Tono / *paserah} tembalih.
son-DEF PERF father Mr . Tono who call-APPL
'{Father/*Mr. Tono/*Who} called his son.'

Balinese (Artawa 2013: 10; Udayana 2012: 108–109)

(5) Nasi-n oke-ne amah **bangkung(*-e).**
rice-LINK 1SG-POSS eat pig-DEF
'{A/*The} pig ate my rice.'

(6) Anak ento **beli-nin** **sabilang anak** baju ento.
person that buy-APPL every person shirt that
'Everybody bought that shirt from the man.'

Mualang (Tjia 2007: 177) [lacks bare active]

(7) Manuk **—** **pakay** p-amis da pian.
chicken eat CAUS-finished LOC bathing.place
'The chickens were eaten up (by rite attenders) at the bathing place.'

Tagalog

Sama Pangutaran Sama Bangingi'

Dusun

Mualang

Sasak.

Madurese

Kendal Javanese

Standard Javanese

Standard Indonesian

Covert Mualang (Tjia 2007)

Analysis

The hierarchy resembles Silverstein's (1976) hierarchy:
In split ergativity: nominals higher in the hierarchy are more likely to be realized as NOM as opposed to ERG.

ERG in syntax + post-syntactic morphology (Legate 2014)

v_{pass} assigns ERG to its Spec, but not ACC (= v_{Erg} of Aldridge 2008).

Adjacency follows from "Voice-Agent-v" configuration?
